- Deployed web projects using GitHub and cloud hosting platforms.

Front-End Developer Virtual Experience Program

2025

- Completed real-world web development tasks and UI implementation exercises.
 - Practiced responsive design, debugging, and version control workflows.
-

University Projects

Lost & Found System

A web-based platform designed for university campuses to help students report, search, and recover lost items efficiently. The system allows users to post details of lost or found belongings, communicate securely, and track item status, reducing the time and effort required to reconnect owners with their possessions.

Library Management System

A database-driven application developed to streamline library operations such as book management, member registration, book issuance, returns, and inventory tracking. The system improves efficiency, reduces manual record-keeping, and provides quick access to library resources.

AgriDrone Mapping

An innovative precision agriculture solution that combines drone technology and AI-powered analytics to monitor crop health, detect pests, assess irrigation needs, and generate actionable insights for farmers. The project aims to increase agricultural productivity while reducing operational costs.

Tech Review Website

A modern technology review platform featuring detailed reviews, comparisons, and recommendations for smartphones, laptops, gadgets, and emerging technologies. The website is designed to provide users with reliable information and help them make informed purchasing decisions.

AI-Based Study Planner & Productivity Tracker (Final Year Project)

Developed a web-based study management system using HTML, CSS, JavaScript, Python (Flask), and SQLite. Implemented an AI-powered recommendation engine to generate personalized study schedules based on subject difficulty, deadlines, and available study hours. Features include task management, progress tracking, Pomodoro timer, productivity analytics, dark/light mode, and PDF schedule export.

SKILLS

- HTML5
- CSS3
- Bootstrap
- JavaScript
- GitHub
- PHP
- Database
- Machine Learning (Basic)
- Computer Networking
- Management Skills
- Creativity
- Problem Solving
- Negotiation
- Critical Thinking
